

THE LEGACY PROJECT

AN INNOVATION EXPERIENCE FOR EXECUTIVES

Today's marketplace requires extraordinary energy and focus from leadership. For executives to access the full-range of their talent, they must concentrate on the few things that matter. They must know their unique creativity and focus it like a laser.

Working with individual CXO's or with executive teams, Annette Moser-Wellman helps identify individual and corporate genius and apply it to the work at hand. Annette provides a model to take what is best in the leader, use it in the most powerful ways and leave a legacy that matters. She assists clients in walking through this proprietary inventory:

The Genius Profile

Next, the leader identifies personal insights and integrates them into the work they do, or desire to do, everyday. Annette helps executives define tasks, roles and responsibilities that will allow them to work on the most productive and profitable concerns.

Legacy Project outcomes include:

- Increased innovation, effectiveness and retention
- Revitalized personal energy and job satisfaction
- Clarity of vision for the firm and for the executive
